Chromatographia Vol. 15, 1982 Contents

Vol. 15, No. 1, 1982

Editorial 3

Originals

HPLC Studies of Peptides The Effect of the Mobile Phase System in Reversed-Phase Chromatography 5
Zhenyuan Hu/Lijun Xia/Jiacheng Xu/Linlin Cheng

Gas Chromatographic and Mass Spectrometric Analysis of Chlorinated Catechols Occurring in Pulp Bleach Liquors 9
J. Knuutinen/J. Tarhanen/M. Lahtiperä

Some Observations on Dynamic Coating of Capillary Columns 13
G. Redant/P. Sandra/M. Verzele

The Use of Microparticulate Guard Columns in Reverse-Phase High-Performance Liquid Chromatography 15
G. D. Reed/C. R. Loscombe

Sorption of the Peroxocomplex of Titanium on Silica Gel and its Analytical Use 18
Z. Čížek/Z. Šulcek/J. Doležal

Possibility of Calculating the R_M Values in Thin-Layer Chromatography Using a Ternary Mobile Phase 25
J. Ościk/J. K. Różyło/J. Gross/I. Malinowska/G. Chojnacka

Gas Chromatographic Determination of Arsenic in Low Concentrations in Inorganic Materials 30
B. Iatridis/Ph. Vroyzi

Glass Capillary Gas Chromatography with Liquid Crystals 33
F. Janssen

Resolution of Some Racemic D. L. Aminoacids on an Ion Exchanger Containing Iminodi (Methanephosphonic) Groups in Amino-Copper Form 38
W. Szczepaniak/W. Ciszewska

Prediction of Retention Times in Temperature-Programmed Gas Chromatography from Isothermally Determined Retention Indices and Adjustment Using Experimental Values of Retention Times (in German) 43
G. Anders/M. Scheller/C. Schuhler/H. G. Struppe

Announcements 48

New Products 49

Vol. 15, No. 2, 1982

Editorial 59

Originals

Partial Volumes in the Water-Acetonitrile-Tetrahydrofuran System 61
N. L. Ha/E. sz. Kováts

Gas and Liquid Chromatographic Separation of Naphthalenophanes of the [2.2] and [3.3] Type 65
A. Deege/B. Heinecke/G. Schomburg

A Collaborative Trial for the Determination of Triazophos in Hostathion® by High-Pressure Liquid Chromatography (in German) 71
J. Asshauer

Ion-Pair Chromatography with Dipolar Hetaerons 75
Z. El Rassi/Cs. Horváth

Determination of Tricyclic Antidepressants Using Silica Gel with a Reversed-Phase Eluent 83
B. A. Bidlingmeyer/J. Korpi/J. N. Little

Stationary Phase Effects in Reversed-Phase Chromatography II. Substituent Selectivities for Retention on Various Hydrocarbonaceous Bonded Phases 86
W. R. Melander/C. Horváth

Separation of Sugars on Chemically Modified Silica Gel (in German) 91
P. Orth/H. Engelhardt

Infra-Red Detection of Waxes in HPLC 97
D. S. J. Atkin/R. J. Hamilton/S. F. Mitchell/P. A. Sewell

Characterisation of Novolaks and Resols by HPLC (in German) 101
W. Werner/O. Barber

HPLC of Carboxylic Acids in Sodium Aluminate Liquors from the Bayer Process (in German) 107
P. Roumeliotis/K. K. Unger/G. Kudermann/G. Winkhaus

High Efficiency Microbore GC Columns Using Porous Layer Bead Supports 117
D. A. Lewis/P. Vouros/B. L. Karger

Fast Analysis by Gas Chromatography 125
G. Gaspar/C. Vidal-Madjar/G. Guiochon

The Solvent Eluotropic Strength on Carbon Adsorbents 133
H. Colin/G. Guiochon/P. Jandera

A Novel Reactor for Photochemical Post-Column Derivatisation in HPLC 140
M. Uihlein/E. Schwab

Note to Authors 147

Announcements 149

Book Review 150

New Products 150

Vol. 15, No. 3, 1982

Editorial 159

Originals

Reaction Detectors in Modern Liquid Chromatography 161
R. W. Frei

Redefinition of Basic Chromatography Terms 167
R. Delley

Relationship Between Molecular Connectivity Indices of Barbiturates and Chromatographic Parameters 172
J. Bojarski/L. Ekiert

Thin-Layer Chromatography of a Number of Inorganic Ions on Sulfoethyl Cellulose in Acetic Acid and in Acetic Acid-Ammonium Acetate Media 177
T. Shimizu/H. Tanaka/T. Ohsawa/R. Kuroda

A Rapid Gas Chromatographic Method for the Analysis of Acidic Fermentation Products 180
I. W. Drummond/G. Shama

Short Communication

Gas Chromatographic Analysis of Ethylbenzene Hydroperoxide 183
U. Stănescu/A. Fărcas/V. Petruta

Review Paper

Donor-Acceptor Complex Chromatography (DACC) Part I. Introduction and Nomenclatur 186
W. Holstein/H. Hemetsberger

Announcements 191

New Products 194

Note to Autors 195

Green Pages

The Solubility Parameter as a Tool in Understanding Liquid Chromatography 205
P. J. Schoenmakers/H. A. H. Billiet/L. de Galan

Vol. 15, No. 4, 1982

Editorial 217

Originals

Sensitized Room-Temperature Phosphorescence for Detection in Continuous Flow and Chromatographic Systems 218
J. J. Donkerbroek/N. J. R. van Eikema Hommes/C. Gooijer/N. H. Velthorst/R. W. Frei

Anion-Exchange Behaviour of a Number of Metal Ions on DEAE-Cellulose in Hydrobromic and Hydriodic Acid Media 223
R. Kuroda/T. Ishida/T. Seki/K. Oguma

Dimethylformamide as a Mobile Phase Component in Reversed-Phase Liquid Column Chromatography and Octadecylsilica 227
M. Ryba

Characterization of a Heavy Coal Liquefaction Product by Combined High-Performance Liquid Chromatography/Mass Spectrometry (in German) 231
W. Holstein/D. Severin

Donor-Acceptor Complex Chromatography. Reversed-Phase Chromatography on Chemically-Bonded Acceptor-Ligands 236
H. Hemetsberger/H. Ricken

Gas-Liquid Chromatography of Isopropylidene Monosaccharides and Their Trimethylsilyl Derivatives 241
R. Novina

A Chromatoscopic Study of Fluorene, Indenes and Styrene 245
L. D. Dimitrov/A. V. Kiselev/R. S. Petrova

Short Communication

Resolution of Dianthrone Glycosides and Anthraquinone Glycosides by Thin-Layer Chromatography 249
P. P. Rai/M. Shok

Review Paper

Donor-Acceptor Complex Chromatography (DACC) Part II. Review of Papers 251
W. Holstein/H. Hemetsberger

Book Reviews 258

VOL.
15
198

Chromatographia Vol. 15, 1982 Subject Index

Acetate media 177
Acetic acid media 177
Acidic fermentation products, GC of 180
Adogen-381 315
Adsorption chromatography 205
– isotherm 743
– modifiers 751
Ag^+ complexation 65
Air-segmented flow system 459
Aliquat 336 717
Alkanes, connectivity index of 521
– , retention index of 521
– , van der Waals' volume of 521
Alkyl benzenes, long chain 361
– – retention of 611
– chain length, of bonded phases 667
– polysiloxane films, crosslinking of 599
Amine bonded phase, in LC 277
Amino acids 38
Analysis, environmental 161
– , high speed 546
– , of trace organics 161
– , pharmaceutical 161
Analytical performace 498
Anion-exchange, in TLC 223
Anthraquinone glycosides, TLC of 249
Apparatus, for capillary manufacture 569
Aromatic hydrocabrons, GC of 245
Arsenic, GC of 30
– , in alloys 30
– , in inorganic materials 30
– trichloride, extraction of 30
Atmospheric pollutants 712
Atomic absorption 717
Avicel SF 223
Aza-arenes, GC of 374

Band spreading 546, 769
– – , in LC 140, 161
– – , numerical analysis 769
Barbiturates 172
Bayer process 107
Benzoyl chloride, deactivation by 358
Binary aqueous systems, in LC 61
Blood and tissue assays 451
Bonded amino groups 91, 751
– phases 667
– – , by hydrocarbon 86
– – , in LC 236
Butylated derivatives 509

Calf thymus DNA 282
Capacity factor 688
– – , LC 5
Capillaries, porous layer 361
Capillary columns, dynamic coating of 13
Capillary drawing 569
Capillary GC – see GC, capillary
Carbohydrate analysis 476
Carbohydrates, chromatography of 378
Carbon adsorbents 712
– molecular sieves 297
– -silica adsorbents for GC 517
Carbosieve S 297
Carbowax 20M columns 505, 635
Carboxylic acids, LC of 107
Carrier gas, viscosity of 577
Cation-exchanger, strong acid 177
Cationic hetaerons 75
Centrifugal TLC, parameters 493
Chloramphenicol, by LC 737
– monosuccinate ester 737
Chloride distribution coefficient 701
Chlorinated catechols, GC of 9
– guaiacols 707
Chlorpyrifos 669
Chromatographic paramters 172
– response function 498
– terms 167
Chromatography in China 191
– of carbohydrates 378
Chromatoscopy 245
Chromosorb W, active sites on 358
Citric acid, in LC 18
Clinical analysis 83
Clovoxamine in plasma 453
Coal liquefaction products 231
– tar, GC of 374
Coating solutions, viscosity of 305
Cobalt, extraction chromatography of 717
Co-distillation – solvent extraction 559
Colorimetric detection 403
Column dimensions, and detection 409
– efficiency 282
– reproducibility 282
– , test procedures for 577
– , tetrachlorophthalimidopropylsilane modified 231
Complex formation, post column 697
Contamination-free injection, in GC 312
Correlation of chromatographic parameters 172
Counting efficiencies 445
– performance 445
Cross-linking 599

Dansyl derivatives, TLC of 309
Data handling 543
DEAE cellulose 223
Definition, of chromatographic terms 167
Delta sleep-inducing peptide 5
Derivatisation of phenols 660
– , post-column 140
Detection, by indirect photometry 653
– , fluorescence 685
– , by ion-pairing probes 437
Detection, continuous flow 218
– , in LC 433
– . light scattering 475

Detector, fluorescence 459
– , mass for LC 476
– , on-line fluorescence 449
– response, model for 437
– , uv-vis 451
Dianthrone glycosides, TLC of 249
Diazoethane, derivatization 9
Diode-array spectrophotometer 433
5,5-diphenylhydantoin, in biological specimens 509
– – , metabolites of 509
Dipole association, model of 650
– complexes 75
Distribution coefficients 701
Disulphides, organic 525
Donor-acceptor complex chromatography 186, 231, 236, 251
– – – , review of papers 251
– – – , stationary phases 251
– – ligands 236, 251
Drugs, LC of 451
Drying speed, of liquid films 13
– step, of supported catalysts 351
Dual detection system 426
Dynamic coating, of glass capillaries 13, 305

Efficiency, definition of 167
– , in LC 167
– , of glass capillaries 13
Eluent composition 61
– – , effects 309
Eluotropic strength on carbon 133
Elution, of lanthanides 697
Environmental analysis 161, 433
Enzymes, detection of 449
Ephedrine, LC of 289
Ethylbenzene hydroperoxide 183
Exhaus gases 631
Extraction paper chromatography 301
– chromatography of radiotracers 315
Eye lens proteins 475

FID, modified 631
Field-flow fractionation 426
Film thickness, in glass capillaries 13
Flow cell, corrosion resistant 645
– cells 468
Fluorescence detection 449, 685
Fluoride counterion 701
Fluvoxamine in plasma 453
Free energy relationships, linear 611
Frontal analysis 743
Fused silica columns, manufacture of 569

Gadolinium oxide sulphide phosphors 697
Gas extraction 587
– velocity 183
GC, capillary 13, 65, 125, 361, 364, 374, 546, 564, 575, 625, 704, 707
–, – selectivity of 33
–, – surface effects in 641
–, – , glass 9, 33, 305, 335, 505, 514, 584, 599, 639
– , chemical derivatisation in 317
– , contamination-free injection in 312
– , efficiency parameters of 577
– , fast 125
– , headspace 587
– , in qualitative analysis 355
– GC-MS 117, 289, 358, 374, 559, 564
GC, of chlorinated catechols 9
–, – sorbose derivatives 704
–, – acidic fermentation products 180
–, – acyl chlorinated guaiacols 707
–, – alkanes 521
–, – alkyl acetates 635
–, – arsenic compounds 30
–, – chlorinated 4-hydroxybenzaldehydes 364
–, – – methyl esters 505
–, – 5,5-diphenyl hydantoin 509
–, – essential oils 559

–, – naphthalenophanes 65
–, – N-containing compounds 564
–, – nitrobenzene photolysis products 34
–, – organic pollutants 712
–, – PAHs 757
–, – perchloroethylene 587
–, – permanent gases 297
– , on carbon molecular sieves 297
–, – – -silica 517
–, – graphitized carbon 245
–, – -line testing of 577
–, – liquid crystals 757
– , physicochemical applications 317
– , preparative 765
– , quantitative 587
– , retention index 771
– , reversal flow 351
– , silica capillary 335, 569, 584, 599
– , Teflon capillary 641
– , temperature-programmed 43
– , with microbore columns 117
Gel permeation chromatography – see GPC and Size-exclusion chromatography
Glass beads, in GC 117
– capillaries, efficiency of 305
– – , performance of 33
– – , pretreatment of 33
– – , quality of 305
– capillary GC – see GC, glass capillary
GPC 475
Gradient elution 97
Gradients, binary and tertiary 97
Graphitized carbon black, GC on 245
– – traps 712
Guaiacol 9
Guard column, microparticulate 15

Halide selectivity 701
Headspace GC 587
Heats of adsorption, in LC 236
High-performance liquid chromatography – see LC
Homologous series, LC of 86
Hostathion, by LC 71
HPLC – see LC
Hydriodic media for TLC 223
Hydrobromic media for TLC 223
4-Hydroxybenzaldehyde derivatives 364
Hydroxyl, surface 584

VOL 15 198

Iminodi(methanephosphonic) ion-exchanger 38
Injection techniques, in LC 15
– , theroretical aspects of 575
– volume, maximum 409
Injector bypass 595
Inorganic chromatography 259
Instrumental effects 125
Integrated hydrogen reactor 631
Interfacial tension 133
Intermediate condensation 765
Ion-exchange, in liquid-liquid systems 301
– , strong base resin 701
– -exchanger 38
– -pair chromatography 75, 653
– formation 282
– – pairing probes 437
Irradiation, of films 599
Isopropylidene monosaccharides, GC of 241

Kaolin-coated capillaries 361
Kinetic studies, by GC 351

Laser-induced spectroscopy 645
LC, bonded phases in 236
– , column coupling in 15
LC columns, life of 595

– –, – sulphonated azo dyes 301
– electrophoresis, of organic disulphides 525
Parameter estimation 43
Parathion 669
Partial volumes 61
Partition chromatography 205
– coefficients 723
– – , of enantiomers 38
Peak detection 543
– splitting, mechanism of 289
– symmetry, in LC 15
PEG 1500 361
Peptides, LC of 5
Peroxide treatment, of films 599
pH, dependence of adsorption of Ti compounds 18
Pharmaceutical analysis 161
Pharmaceuticals, solvents in 587
Pharmacokinetic studies 685
Phase separators 161
– transitions, in films 517
Phenol formaldehyde resins, by LC 101
– , R_m of 25
Phenylpolysiloxanes, cross-linked for GC 335
Photoacoustic spectroscopic detection 645
Photochemical reaction 140
– – , optimisation 140
Photodiode array detection in LC 419
Photolysis products of nitrobenzene 341
Photometry, indirect 653
Phthalides, naturally occurring 358
Phylloquinone 459
Piezo electric transducer 645
Piglet plasma 737
Plasma and serum 453
PLOT, column 361
Polarity, of stationary phase 771
Polynuclear aromatic hydrocarbons – see PAH
Polyols 241
Polysiloxane stationary phases, preparation 335
Porous bead supports, in GC 117
– layer beads 117
– silica 584
Post-column reduction 459
Practical rules, for LC phase selection 205
Pre-columns for LC 453
Preparative TLC 493
Programmed temperature rise 635
Propanolol, in serum 685
Pulp bleach liquors 9
Pyrex glass capillaries 584

Quantitative analysis 543, 546

Racemates, resolution of 38
Radioactivity monitor 468
– – , performance 445
– – , resolution 445
Reaction detector for LC 161, 403
Reactor design 140
Relative molecular mass distribution 426, 475
– retention, calculation of 514
Resolution, definition of 167
– factor 688
– , in LC 205, 277
Retention behaviour, of nucleobases and nucleosides 282
– data, for organic acids 180
– , effect of counterions 5
– , effects in LC 667
Resols, by LC 101
Retention index 515, 771
– – , of hydrocarbons 625
– indices, isothermal 43
– – , in capillary GC 43
– , structure effects on 611
– times, prediction of 43
– volumes, calculation of 245
R_F values, in HBr and HI media 223
R_m value, calculation of 25

Sample clean-up 685
– inlet systems 546
– preparation 468
– size, and detection 409
Sampling efficiency 577
SE-30 columns 505, 635
Secondary cooling 575
Selected ion-monitoring 509
Selectivity, definition of 167
– , in LC 5, 205
Sensitized phosphorescence, in LC 218
Sep-Pak C18 453
Separations, one and two stage 765
– , optimisation of 498
Serum 83
– , propanolol in 685
SF-96 241
Signal derivative 543
– optimisation, equation for 409

VOL. 15 198

Silica, adsorption of Ti compounds 18
– , for TLC 748
– , LC on 83, 743, 751, 760
– , microparticulate 697
– , modified 91, 717, 751
– , unmodified in LC 282
Silicone stationary phases 355
Silicones, on-column oxidation 355
– , oxidation of 355
Size-exclusion chromatography 347, 426
Small particle LC 657
Sodium aluminate liquors 107
Soil extracts 453
Solid phase extraction 83
– scintillator 445, 468
Solubility parameter 133, 205
Solvent effect 575
Solvents in pharmaceuticals 587
Solvophobic interactions 236
Sorbose derivatives, GC of 704
Sorboses, isopropylidene 704

Triazophos, by LC 71
Tricresyl phosphate 183
Tricyclic antidepressants, LC of 83
Trideuteromethylated derivatives 509
Tritium exchange 584
Tryptophan hydroxylase 449

UV-Vis detection 419
– , rapid scan 433

van der Waals' volumes 12, 771
VARIO-KS chamber 249
Vitamin K homologues 459
Vydac C18 367

Waxes, infrared etection of 97
– , LC of 97

Zwitterion detergents 75

Chromatographia Vol. 15, 1982 Key Words

Acetic acid and acetate media 177
Acetyl derivatives 707
Acidic fermentation products 180
Adogen-381 315
Adsorption from binary mixtures 743
Ag^+ complexation in mobile phase 65
Air segmented flow systems 459
Aliphatic amines dansyl derivatives 309
Alkanes 521
n-Alkyl acetates and chloracetates 635
Alkylammonium salt extractants 717
Alkylbenzenes 611
Alkylpolysiloxanes 599
Aluminate liquors 107
Amine bonded phase 277
Amino acids 38
Amino groups, bonded 91
Analysis of ethylbenzene hydroperoxide 183
Analytical performance 498
Anion-exchange 223
Anthraquinone glycosides 249
Antibiotics 367
Aromatic amines 227
Aromatic hydrocarbons 245
Arsenic 30
Automobile exhaust gases 631
Aza-arenes 374
Aza-aromatic compounds 227

Band spreading 769
Barbiturates 172
Bayer process 107
Binary aqueous systems 61
Blood, tissue 451
Bonded-phase columns 751
Bonded phases 667

Calculation methods 409
Capacity 765
Capillary columns 125, 361, 546, 569, 599
Capillary drawing 569
– GC 13, 335, 364, 374, 584, 707
– GC, high temperature 65
– GC/MS 564
Carbohydrates 476, 751
Carbon adsorbent 133
– molecular sieves 297
– -silica adsorbents 517
Carbowax 20M 635
Carboxylic acids 107
Centrifugal chromatography, preparative 493
Characterisation 180
Chemically bonded phases 236
– modified teflon 641
Chemical post-column reduction 459
Chloride 701
Chlorinated catechols 9
– guaiacols 707
Chloramphenicol and monosuccinate ester 737
Chlortetracyclines 367
Chromatographic paper sorbents 650
– parameters 172
– response function 498
– terms 167
Chromatography 245
Chromosorb W 358
Clinical analysis 83
Coal liquefaction products 231
– tar 374
Collaborative trial 71
Colorimetric detection 403
Column coupling 15
– lifetime in LC 595
– test procedure 577
Comparison of liquid phases 625
Computing integrator 577
Connectivity index 521
Counterion dependence 701
Cross-linked phenyl polysiloxanes 335
Crosslinking by γ-radiation and peroxide treatment 599

Data handling 543
DEAE-cellulose 223
Definitions 167
Dependence on the applied quantity 769
– developing time 769
Derivatization 140
Detection 437, 475
– , continuous flow 218
Dianthone glycosides 249
Diazo-4-aminobenzonitrile 660
Dibenzofurans 218
Dilution and signal enhancement factor 409
5,5-Diphenylhydantoin 509
Dipole complex 75
Distribution coefficient 701
Disulphides 525
Donor-acceptor complexes 186, 231, 251
– ligands 236
Drugs and analogues 451
Drying speed, influence of 13
– step 351
Dual-stage separation 765
Dynamic coating 13

Effect of chain length of 667
– – counterions on retention 5
– – mobile phase systems 5
Efficiency 13, 161
– and coating parameters 305
Efficiency parameters of chromatographic columns 577
Electrophoresis 525
Eluent composition 61, 309
Eluotropic strength 133
Environmental analysis 167, 433
Ethylene oxide in sutures 587
Extraction chromatography 315, 717
– of sulfonated chelating reagents for metals 301
– paper chromatography 301

VOL 15 198

Fast analysis 125
FID with integrated hydrogenation reactor 631
Field-flow fractionation 426
Film thickness 13
Flow cells 468, 645
Fluorescence detection 449, 685
Fluorimetric detection 459
Formaldehyde traces 631
Free formaldehyde 101

– scintillator 468
– -solid chromatography 61, 743
Locating and chelating agent 748
Long chain alkylbenzenes 361
Low level counting 468
Low voltage mass spectrometry (or MS) 231
Luminescent phophors 697

Mass detector 476
– spectra 704
– spectrometry 414
Mathematical modelling 43
Maximum injection volume 409
Mercury plug dynamic coating method 305
Metabolite interference 685
Metabolites 509
Methyl chloroacetates 505
– chloropropanoates 505
– chlorobutanoates 505
– esters 180
MHNAMT 748
Micro HPLC 723
Micropreparative LC 414
Minocyclines 367
Model of dipole association 650
Molecular connectivity 172
– structure and retention 245
– weight distribution 426
Mononitroalkanes 514
Monosaccharides 241
Multiple linear regression analysis 364

Naphthalenophanes, isomeric 65
Naphthylamine sulfonic acids 75
Nitrobenzene 341

Nitrogen-containing compounds 564
in situ nitrosation 665
Nitroso-R-salt reagent 717
N,N-Dimethylformamide 227
Non-aqueous reversed-phase chromatography 459
Non-extractable stationary phases 335
Nucleobases 282
Nucleosides 282
Nucleotides 75
Numerical analysis 769

n-Octadecanol film 517
Octadecyl silica 309
Open-tubular (capillary) columns 625
Optimization 125, 498, 688
Organic air pollutants 712
Organophosphate pesticide metabolites 669
– pesticides 669
Overlapping resolution mapping 277
OV-351 635
Oxidation 355
Oxo-synthesis 297
Oxygen and nitrogen traces 312

3 µm packing materials 657
PAN chelates 527
Parameters 493
Partial volumes 61
Partition coefficient 723
Peak broadening 140
– detection 543
– splitting 289
Perchloroethylene in food 587
Permanent gases 297
Pharmaceutical analysis 161
Phase transitions 517
Phenol/Formaldehyde resins 101
Phenols, derivatised 660
Phosphorescence, room-temperature 218
Photochemical reaction 140
– – detection 459
Photochemistry 341
Photolysis 341
Phtalides 358
Piezoelectric ceramic transducer 645
Piglet plasma 737
Plasma and serum 453
Polarity of stationary phase 771
Polycyclic aromatic hydrocarbons 33, 757
Polymer analysis 426
Polynuclear aromatic hydrocarbons 645
Polyols 241
Polystyrene packings 347
Porous layer beads 117
Post-column monitoring 468
Precalculation 514
Precolumns 453
Preparative scale chromatography 765
Propanolol in serum 685
Pulp bleach liquors 9

Quality control 101
Quantitative analysis 543, 546
– structure – activity relationship 723
– – – retention relationships 86

Radioactivity detector 445
– monitor 468
Radiotracer separation 315
Rapid-scan UV/visible spectrophotometry 433
Reactor design 140
– detectors 161, 403
Resolution 167
– of racemates 38
Retention 205
– index 514, 521, 771
– – data 625
– times, prediction 43
Reversed-flow GC 351
Reverse phase 15, 236, 437, 657, 667, 737
Reversed phase chromatography 86, 611
